

Mohammad I. Khan Houston, TX | Ikhanmetropcs1@gmail.com | [LinkedIn Profile](#) Objective

Accomplished IT professional with over 15 years of experience spanning OpsTech, DevOps, and network infrastructure management. Seeking to leverage a strong background in automation, infrastructure optimization, and hardware/software troubleshooting to deliver highly reliable, client-focused solutions at a forward-thinking technology company.

Professional Summary

Results-driven Infrastructure and Operations Technology Specialist with extensive expertise in network management, systems deployment, and field support across enterprise-scale environments. Proven track record of managing MDF/IDF closets, maintaining high-uptime LAN infrastructures, and executing large-scale workstation deployments. Highly adept at utilizing Python and Linux for environment support, implementing automation, and coordinating across cross-functional engineering teams to drive down operational downtime.

Professional Experience Amazon.com | Houston, TX Operations Technology Specialist (OpsTechIT / OTS)
| *September 2022 – June 2026*

- **Infrastructure Optimization:** Maintained high-performing Amazon Robotics (AR) floor-grid hardware and software infrastructure in collaboration with robotics teams, successfully reducing operational downtime by 15%.
- **Migration from Corp/campus:** Achieved end goal by collaborating with OTIE back-end teams, completing IoT(MDM) devices to cloud migration, saving millions of dollars in maintenance costs.
- **Network Reliability:** Monitored network health using SNMP monitoring portals to proactively resolve MDF/IDF device auto-cut tickets, securing a 3-month consecutive streak of 100% LAN uptime.
- **Incident Management:** Resolved 3,000+ complex LAN SLA tickets within the ServiceNow platform, ensuring continuous operations and alignment with tight daily site production goals. Migrated Outlook generic user accounts to M365, increasing user productivity.
- **Lifecycle & Projects:** Executed weekly, monthly, quarterly, and annual technical lifecycle projects to deploy, configure, and install ad hoc hardware and software hosts across the local area network.
- **Supply Chain & Inventory:** Utilized the internal DSCS supply chain platform to manage equipment ordering, Return Merchandise Authorizations (RMAs), and liquidations, maintaining a highly accurate inventory ledger.
- **Security & Vulnerability Mitigation:** Collaborated with offsite network engineers to isolate LAN vulnerabilities, patch active systems, and maintain restrictive Access Control Lists (ACLs).

- **Automation & Maintenance:** Conducted network maintenance and Corp-to-Cloud Migration Method Statements (MCMs), supporting Amazon Robotics workstations via PowerShell, Python scripting, and Linux virtual machines.

Amazon.com | Houston, TX IT Ambassador / Lead Assistant / QoS | October 2018 – August 2022

- **Cross-Functional Leadership:** Led a cross-functional support operation spanning 8 departments, utilizing formalized communication matrices to enforce strict enterprise IT standards.
- **Scale Deployments:** Directed the installation, deployment, and configuration of 75 specialized warehouse workstations, yielding an immediate 25% increase in daily operational throughput.
- **Advanced Troubleshooting:** Diagnosed and resolved recurring connectivity issues for HP Thin Client devices using the OSI model framework to isolate local layer faults.
- **Testing Implementation:** Successfully deployed, managed, and proctored a site-wide UV testing project across the DHO1 and DPA7 logistics fulfillment centers.

Boost Mobile | Houston, TX

Operations Manager | June 2016 – December 2019

- **Device Management:** Tested, provisioned, and configured multi-vendor smartphones for Sprint enterprise compatibility.
- **Identity Management:** Assisted clients with cloud account architecture configurations spanning Google Workspace, Microsoft Azure/Office 365, and Apple ecosystems.

Tara Export | Houston, TX

Operations Manager | June 2015 – August 2018

- **Network & Server Management:** Configured and managed an on-site Lenovo TS140 server running Windows Server 2012 Essentials; optimized LAN infrastructure based on the OSI model to maximize available bandwidth.
- **SaaS Administration:** Administered Google G Suite (Workspace) domains, corporate email servers, and shared cloud drives, reducing reliance on third-party IT outsourcing.

Sprint / Glow Networks Inc. | Dallas, TX

RF Tester / QoS Specialist | December 2014 – January 2015

- **Network Launch Support:** Accelerated the delivery of the SNV 4G LTE 800 MHz site deployment project on time, completing 35 Single Site Inspections (SSDs) and an MSV to secure future client contracts.

•
Scarlet Wireless Inc. / Ericsson Inc. | Alexandria, LA RF Tester / QoS Specialist | July 2014 – December 2014

Signal Validation: Analyzed and verified AT&T 4G LTE 5/10 MHz multi-carrier frequencies using the IMS packet core system to maximize cell coverage footprint.

- **Scripted Diagnostics:** Configured specialized AT&T GS4, TEMS, and iPerf scripts during drive tests to gather network metric logs and significantly minimize jitter.

Glow Networks Inc. / CSS Corp | Austin, TX

RF / QoS Tester | August 2013 – June 2014

- **Log Analytics:** Monitored SNV 800/1900 MHz network clusters via Putty and command-line interfaces; compiled and uploaded rigorous ATP cluster log files to secure engineering servers.

Ericsson Inc. / Scarlet Wireless | Livingston, TX

RF Tester / QoS Specialist | October 2012 – February 2013

- **Operations Coordination:** Structured and aligned daily drive testing operations alongside regional T-Mobile corporate requirements.

Cricket Wireless / Wireless Point | Houston, TX

Operations Manager | January 2009 – August 2013

- **Multi-OS Support:** Provisioned and flashed CDMA/GSM handsets across Android, Blackberry, Bada, and Symbian mobile platforms.

Technical Skills

- **DevOps & Scripting:** Python, PowerShell Scripting, SQL (Database Management), AWS (Cloud Infrastructure)
 - **Networking & Communication:** 3GPP, WCDMA, GSM, 4G/LTE, VoLTE, OSI Model Layer Architecture
 - **Hardware & Hardware Platforms:** Cisco Routers (2900, C9300, ASR1001-X), Enterprise Wireless Access Points (APs), Juniper Mist Firewalls, MDF/IDF Room Topologies, Motherboard Validation, provisioned HP thin clients, and ADVANTECH MIC 700 industrial switches.
 - **Operating Systems:** Windows (NT through Windows 11), Windows Server (2000, 2012), Linux (Ubuntu, Kali)
 - **Enterprise Tools:** ServiceNow, SNMP Monitoring Systems, PuTTY, CLI scripting
-

•

Education & Certifications

- **Bachelor of Science in Computer Science** (In Progress) | *Southern New Hampshire University* |
Expected Graduation: December 2027
- **Cisco Certified Network Administrator (CCNA) Coursework** | *Lone Star College* (2023 - 2025) **OSI-Model Networking Certification/Course** | *Ryerson University, Toronto, Canada* (2006 - 2007)
- **Associate of Applied Science (AA)** | *San Jacinto College, Houston, TX* (1998 - 2000)
- **Diploma in Motherboard Testing** | *Technical Institute of Sicklerville, Sicklerville, NJ*
