

MOHAMMAD I KHAN

Houston, TX • 832-537-4477 • ikhanmetropcs1@gmail.com • linkedin.com/in/mohammad-khan-02641b58

PROFESSIONAL SUMMARY

IT infrastructure and operations technology professional with 15+ years across enterprise networking, endpoint engineering, and field support. Level II support for an Amazon Robotics fulfillment site, owning IDF/MDF network infrastructure on Cisco Catalyst 9000 switching, provisioning and deploying the full endpoint fleet across the production floor, and leading change-managed migrations of corporate LAN and IoT assets into AWS. Background spans RF/LTE carrier network testing, Linux and PowerShell scripting, and security patching and hardening of production endpoints. Pursuing a BS in Computer Science.

TECHNICAL SKILLS

Networking: Cisco Catalyst 9000 (C9K) series switching; IDF/MDF closet infrastructure; LAN/WAN; structured cabling; net quarantine throughput and connectivity testing; ACL design; Juniper firewalls (IDS/IPS); SNMP monitoring; RF/LTE network testing

Cloud & Virtualization: AWS — VPC, S3, EC2/SSH session access, IoT device management, cloud migration; Docker containerization; Hashi Corp Vagrant automated provisioning

Endpoints & Hardware: HP Elite Book Pro G5–G11 laptops; HP t630–t655 thin clients; HP Pro desktops; Amazon Robotics thin clients; Amazon Pinnacle; Zebra ZT410/ZT411, ZD420/ZD421, ZQ6000, TC56/TC57; Honeywell 1950GSR scanners; Bosch i6000 camera systems, NICs of Schneider Electric APC UPC power supplies

Operating Systems & Scripting: Windows 10/11; Linux (Debian/Ubuntu, apt package management); PowerShell; Bash; BIOS-level configuration; PXE/network imaging and re-imaging; setup Linux (Ubuntu provisioning station) for Local IT-team

Security: Qualays vulnerability scanning and patch remediation; Microsoft security, feature, and quality update deployment; full-disk encryption verification; ACL-based intrusion detection and prevention; endpoint hardening before production release

Platforms & Process: Service Now (incident, request, and asset queues); Microsoft Exchange; Print MON; MCM (Modeled Change Management); SoC/MoC change control; SLA-driven ticket management; Gemba walks; technical documentation and new-hire training

PROFESSIONAL EXPERIENCE

Operations Technology Specialist — Ops Tech IT / OTS, Support Level II | Amazon.com

Houston, TX | Sep 2022 – Jun 2026

Network Infrastructure

- Maintained IDF and MDF network infrastructure for an Amazon Robotics fulfillment site, managing Cisco Catalyst 9000 series switching across 26 closets serving 7000+ production endpoints.
- Ran scheduled diagnostics using internal monitoring software, testing between IDF and MDF devices to validate throughput and isolate link degradation before it reached the production floor.
- Authored MCMs (Modeled Change Management) for Amazon Robotics IDF/MDF infrastructure work, documenting scope, rollback, and risk so changes executed inside approved maintenance windows without unplanned downtime.
- Sustained 99% network availability across the robotics floor grid with 1% network-caused production interruptions over 4 years.
- Network security using PUTTY GEN Key pairs for information security on Corp/Enterprise network

Cloud Migration & Automation

- Led SoC/MoC change-managed projects migrating corporate network infrastructure and LAN-attached IoT devices to AWS, coordinating across OTIE, LAN/WAN, and site leadership.

- Administered migrated IoT and thin-client devices in AWS VPC using SSH terminal sessions and PowerShell, pushing apt-get update/upgrade operations to keep local device databases current.
- Applied Docker containerization within AWS VPC to support Amazon Robotics thin-client workloads during and after migration.
- Automated provisioning of Amazon Pinnacle units and HP t630–t655 thin clients for the corporate network using Hashi Corp Vagrant, cutting manual build steps and standardizing configuration across the fleet.

Endpoint Engineering & Deployment

- Provisioned Amazon Robotics thin clients end-to-end for floor workstations: BIOS-level factory reset on a test workstation, network imaging, configuration through the site provisioning tool, physical deployment, and full functional validation before production release.
- Imaged, deployed, and installed HP Pro desktops and HP Elite Book Pro G5–G11 laptops; re-imaged endpoints that failed to receive automatic security, feature, and standards updates, returning them to a fully compliant baseline.
- Secured user data ahead of endpoint rebuilds by backing up to AWS S3 within the site VPC, preventing data loss across 800 laptop remediation.
- Deployed and configured Zebra TC56/TC57 mobile computers through the OTIE portal QR-code imaging workflow, and provisioned Honeywell 1950GSR scanners for production use.
- Repaired and maintained Zebra ZT410/ZT411 industrial printers through field replacement of interchangeable assemblies; pushed firmware and function-specific software using internal provisioning tools, including ZQ6000 units supporting timed SLAM labeling at problem-solve workstations.
- Reconfigured Zebra ZD420/ZD421 printers via Print MON and performed manual print alignment to label-stock specification where automated calibration could not resolve the fault.

Service Delivery & Collaboration

- Owned the HOU-NODAL Service Now queue, triaging and resolving incidents against SLA and routing Robotics, RME, JLL, and LAN/WAN issues to the correct owning team, resolving approximately 15 tickets per week.
- Partnered with RME and JLL on shared facilities-and-network incidents, coordinating access, scheduling, and hand-offs to close tickets without repeat visits.
- Configured and maintained Bosch i6000 site camera systems, supporting physical security coverage alongside network responsibilities.
- Monitored daily communications from vendors, supply chain, and the OTIE (Office of Technology, Infrastructure, and Engineering) team to track project status and act on site security advisories.
- Participated in cross-departmental Gemba walks to surface floor-level infrastructure issues before they generated tickets.
- Trained Day 1 new hires for the site learning department and coached associates and IT equipment coordinators on the Service Now virtual portal, increasing self-service and reducing repeat low-tier requests.
- Documented all work performed daily in Service Now, maintaining an auditable record of infrastructure and endpoint changes.

United Club Attendant | Flik / Compass Group

Houston, TX | Dec 2022 – Present

- Deliver front-line hospitality and service recovery in a high-volume airport lounge environment, maintaining service standards under time pressure.
- Trained new hires on using the Samsung Galaxy S10+ Android upside-down 14 tablets for HACCP temperature entries via BT using NIST temp probes.

Operations Manager | Boost Mobile — Houston, TX

Jun 2016 – Dec 2019

- Tested, provisioned, and configured multi-vendor smartphones for Sprint enterprise network compatibility.
- Managed cloud identity and account architecture across Google Workspace, Microsoft Azure/Office 365, and Apple ecosystems.

Operations Manager | Tara Export — Houston, TX

Jun 2015 – Aug 2018

- Configured and managed an on-site Lenovo TS140 server (Windows Server 2012 Essentials); optimized LAN infrastructure using OSI-model analysis to maximize available bandwidth.
- Administered Google Workspace domains, corporate email, and shared cloud drives, reducing reliance on third-party IT outsourcing.

RF Tester / QoS Specialist | Sprint / Glow Networks Inc. — Dallas, TX

Dec 2014 – Jan 2015

- Supported on-time delivery of a 4G LTE 800 MHz site deployment project, completing 35 Single Site Inspections and an MSV to secure future client contracts.

RF Tester / QoS Specialist | Scarlet Wireless Inc. / Ericsson Inc. — Alexandria, LA

Jul 2014 – Dec 2014

- Analyzed and verified AT&T 4G LTE multi-carrier frequencies via the IMS packet core system; configured GS4, TEMS, and iPerf scripts during drive tests to minimize jitter.

RF / QoS Tester | Glow Networks Inc. / CSS Corp — Austin, TX

Aug 2013 – Jun 2014 • Monitored 800/1900 MHz

network clusters via PUTTY/CLI and compiled ATP cluster log files for engineering review.

RF Tester / QoS Specialist | Ericsson Inc. / Scarlet Wireless — Livingston, TX

Oct 2012 – Feb 2013 •

Coordinated daily drive-testing operations in alignment with T-Mobile regional requirements.

Operations Manager | Cricket Wireless / Wireless Point — Houston, TX

Jan 2009 – Aug 2013 • Provisioned

and flashed CDMA/GSM handsets across Android flavors, BlackBerry, Bada, and Symbian platforms.

EDUCATION & CERTIFICATIONS

Bachelor of Science, Computer Science: Southern New Hampshire University — expected Dec 2027

CCNA Cisco Network Administrator Coursework: Lone Star College June 2000

Associate Degree / Coursework: San Jacinto College — Associate of Applied Arts July 2025

Coursework: Ryerson University— OSI/TCP IP Networking June 2007

Completed IBM AI models essentials; Completed Cisco AWS cloud Enterprise Networking, Security, and Automation (ENSA) supplemental Modules January 2025
